Trend – ဦးတည်ရာ လမ်းကြောင်းသစ်

Digital Transformation

It's a Significant Trend

ပတ်ဝန်းကျင်မှာ ဘာတွေဖြစ်နေလဲ ဆိုတာကို
သတိပြုမိရာကနေ Trend ကို မြင်ပါတယ်။

Key Drivers – တွန်းအားစုတွေ

People & Culture					
Process					
Data					
Technology					

Digital Transformation ကို ရှေ့ဆက်သွားစေနိုင်တဲ့ တွန်းအားစုများ

Digitally Changed - အဆင့် မြှင့်တင်

တွန်းအားစုများ ကို ဒစ်ဂျစ်တယ်အသွင် အဆင့် မြှင့်တင် ပြောင်းလဲခြင်း

Scenario – အနာဂတ် ဇာတ်လမ်း

Global, Ongoing Process

It's Everyone's Concern

Affected Areas

Primary Initiators

Organization Type	Reason for Initiation	Example
Technology Companies	Innovate with new digital tools, platforms, and ecosystems	Facebook, Viber, Grab, Food Panda, ...
Corporations & Enterprises	Drive transformation to improve efficiency, customer experience, and product innovation	retailers, manufacturers, telecoms
Public Sector & Government	Provide digital public services, smart city initiatives, regulatory compliance	immigrations, municipalities, healthcare agencies
Financial Institutions	Lead digital payment systems, mobile banking, fraud detection	banks, fintech companies, insurance firms
Healthcare Organizations	Implement telemedicine, digital records, AI diagnostics	Hospitals, clinics, health networks

Organizations are typically the initiators and drivers of digital transformation, creating the platforms, services, and infrastructure that enable individuals and consumers to transform digitally.

Be aware that –

- › Bad actors are transforming too
 - › Cybercriminals, online fraud, phishing scams
 - › Social engineering on apps and platforms
- › If you're not digitally aware, you are more likely to:
 - › Fall victim to fraud
 - › Unknowingly spread misinformation or be manipulated

Be the change

Driving Digital Transformation as a Catalyst

Changing Key Drivers

Drivers	Work	Term	Example
Technology	Changing tools that enable digitizing, digitalization, and transformation.	Digital Technologies	Mobile Apps, Cloud, AI, Blockchain, IoT, Big Data platforms
Data	Changing analog to digital.	Digitizing	Scanning paper documents into PDFs or entering handwritten data into Excel.
Process	Changing digital tools to improve processes	Digitalization	Automating payroll using an HR software or using a CRM to track leads.
People & Culture	Changing how people think and work digitally.	Digital Transformation	Shifting to remote work with collaborative digital tools (e.g., Teams + cloud file sharing), or transforming a traditional retailer into an omnichannel e-commerce business

Staircase and Steps

Berger explains that **people don't change because they're pushed — they change when barriers to change are removed**. He introduces 5 barriers using the acronym

“REDUCE”

/ 1. Reactance – တုံ့ပြန်မှု

- › Barrier: People push back when they feel their freedom is being threatened.
- › Insight: In digital transformation, top-down mandates often cause resistance.
- › Tactic: Offer choice, autonomy, and involve users early.

2. Endowment – တင်ငံခံမူ

- › Barrier: People overvalue what they already have.
- › Insight: Employees cling to old systems, processes, or legacy tools.
- › Tactic: Show them the cost of inaction and the true value of new tools.

3. Distance – အလွမ်းဝေးမှု

- › Barrier: If new ideas feel too different, they get rejected..
- › Insight: Radical digital changes overwhelm users.
- › Tactic: Use **intermediate steps**, build familiarity gradually.

4. Uncertainty – မသေချာမှု

- › Barrier: Fear of the unknown stops action.
- › Insight: New systems feel risky, especially without proof.
- › Tactic: Lower perceived risk — pilot programs, trials, peer champions.

5. Corroborating Evidence – သက်သေအထောက်အထား

- › Barrier: One source isn't enough — people need validation from multiple directions.
- › Insight: Digital initiatives are accepted faster when backed by peers, metrics, and stories.
- › Tactic: Share success stories, peer testimonials, and data.

How to communicate for Change?

- › မပြောင်းလဲ လို့ ဖြစ်ပေါ်လာမယ့် ဆိုးကျိုးတွေ နဲ့
- › ပြောင်းလဲ လိုက်ရင် ရရှိလာမယ့် ကောင်းကျိုးတွေ ကို
- › နားလည် လက်ခံသွားအောင် အသိပေး။

အသိပေးတဲ့ နေရာမှာ အကြောင်းအရာတူကိုပဲ လူတွေရဲ့ စရိုက် အကြိုက်တွေပေါ်မူတည်ပြီး စကားလုံး ပြောင်းပြောရတာ မျိုးတွေ ပုံစံပြောင်း လုပ်ပေးရတာ မျိုးတွေ လုပ်တာဟာ ပိုထိရောက် ပါတယ်။

Ending Summary

- › Digital transformation is a Significant Trend!
- › Digital transformation is global, ongoing process and it's everyone concern.
- › Being the change, driving digital transformation as a catalyst.
(Referring to the book “The Catalyst – How to change Anyone’s mind” by Jonah Berger)
